PROFILE

Dedicated Software Engineer with expertise in Backend Engineering, Machine Learning, Data Science, and Generative AI. Proven experience building data pipelines, AI-powered applications, automation tools, and cross-platform integrations.

PROFESSIONAL EXPERIENCE

Store & Send Logistics

Mar 2022 – Present

Senior Software Engineer

Kuala Selangor, Malaysia

- Integrated **ERPNext (Frappe)** for a client, configuring modules, developing custom doctypes, and exposing APIs to synchronize business operations including inventory, orders, and reporting with existing systems.
- Integrated ODIN (Cloud Fulfillment Software) with Oracle NetSuite ERP using Node.js to enhance order management and data flow.
- Developed and maintained backend services and RESTful APIs using **Java** (MVC controllers) and **Node.js**, supporting high-throughput data exchange across logistics and e-commerce workflows.
- Designed and implemented scalable microservices enabling seamless data integration across multiple e-commerce platforms with real-time order processing and inventory synchronization, **reducing data landing time by 30%**.
- Developed web applications using Flask and FastAPI for efficient product and customer data management.
- Implemented chat integration across **82 e-commerce stores**, consolidating customer inquiries into a single platform, resulting in a **95% improvement** in customer support efficiency.
- Designed an auto-reporting system that **reduced reporting time by 75%**, enabling faster decision-making and streamlined data analysis.

Afiniti Software Solutions

Apr 2021 – Feb 2022

Software Analyst

Karachi

- Built an NLP-based chatbot using TensorFlow, Keras, and Scikit-learn for intent classification and entity recognition, **achieving 94% accuracy** on client test data.
- Extracted CRM data via Salesforce API into PostgreSQL databases for downstream analytics.

FREELANCE AND CONSULTANCY

Video Elephant | FastAPI, YOLO, DeepGaze, FFmpeg, Amazon S3, Kafka, OCR, ASR

- Developing an AI-powered video orchestration and scoring system that analyses video content to return quality, suitability, and confidence scores with ROI-based routing recommendations (reject, conservative, convert, or premium). Supports synchronous REST, webhook-based polling, and WebSocket streaming APIs.

Tronic Inventory Intelligence Chatbot | Python, LLMs, Twilio, LangChain, FastAPI

- Built a WhatsApp chatbot using Twilio and open-source LLMs for real-time business database analysis and SKU inventory inquiries, **increasing customer engagement by 85%**.

Personality Trait Predictor | Python, NLP, Semi-Supervised Learning, XGBoost

- Built a semi-supervised NLP pipeline for personality trait prediction, developing independent models for three psychometric frameworks including OCEAN (Big Five), SVS (Schwartz Value Survey), and HVP (Hartman Value Profile), using NLP feature engineering and **achieving up to 93% classification accuracy**.

Bank Statement Reconciliation | Python, OCR, LLMs

- Designed an automated reconciliation application using OCR and LLM technologies, significantly improving accuracy and processing efficiency over manual workflows.

Sales Chatbot on YouTube Content | Python, LLMs, RAG

- Developed a retrieval-augmented chatbot over YouTube video transcripts using open-source LLMs for real-time sales assistance.

Tax Filing CRM | Backend Engineering, CRM Design

- Designed a full CRM system for tax filing services for an international client, streamlining case management and client data workflows.

EDUCATION

FAST-NUCES

M.Sc. Data Science

- **CGPA:** 3.83 / 4.0

Aug 2024 – Present
Karachi

NED University of Engineering & Technology

B.E. Computer Systems Engineering

- **CGPA:** 3.76 / 4.0

Nov 2017 – Nov 2021
Karachi

SKILLS

Programming : Python, Java, Node.js, SQL
AI / ML : TensorFlow, Keras, Scikit-Learn, NLTK, YOLO, Computer Vision
Generative AI / LLMs: LangChain, RAG, Prompt Engineering, Twilio
Data Engineering : Apache Airflow, Kafka
Data Analytics : Pandas, NumPy, Matplotlib, Plotly
Web Frameworks : FastAPI, Flask, Django, Express.js
Databases : Oracle, PostgreSQL, MySQL, MongoDB
Cloud & DevOps : AWS S3, Docker, Linux, Git
